Summary

I am an undergraduate student and indie developer with strong interests in accessibility. I enjoy building useful tools and continuously learning new technologies. I adapt quickly, and remain effective under pressure, with a strong commitment to growth and high-quality work.

Experience

NUS Youth Fellowship

Singapore

Undergraduate Student Participant

21 Jun 2026 - 27 Jun 2026

Represented the Department of Statistics, University of Colombo in an international fellowship with 112 participants from 26+ countries. Gained exposure to NUS research, innovation, entrepreneurship, industry, and cross-cultural collaboration. **Certificate**

Aayu Technologies

Mount-Lavinia, Sri Lanka

Intern Front-end Developer

April - October 2023

- Studied enterprise B2B communication systems (AS2, MFT, EDI), focusing on secure data exchange and protocol-driven architectures
- Analyzed frontend issues in Angular dashboard and implemented UI optimizations.

TS Technologies

Colombo 04, Sri Lanka

Intern Front-end Developer

June - December 2022

- Worked on digital kiosk systems for banking, healthcare, and retail, focusing on customer flow.
- **Frontend (React):** Designed modular, reusable UI components
- **Backend (Spring Boot):** Developed and integrated RESTful APIs with MySQL

Education

University of Colombo

Bachelor of Science (Hons.)

Data Science

May 2023 - Present

My coursework spans Data Science, Computer Science, Statistics, Pure Mathematics and Applied Mathematics. Current GPA 3.67.

Cardiff Metropolitan University

Higher Diploma

Computer Science

March 2022 - September 2023

Learned the principles of Software Engineering, System Design, Database Management, Full-Stack Web Development, Android Development and Networking.

Projects

Meta-Vision

An iOS assistive-reading prototype designed to help blind and low-vision users capture documents, verify recognized text, and listen to it quickly and accurately.

<https://github.com/TonyRoyze/meta-vision.git>

Monocle

A native macOS menu-bar app that helps blind and low-vision users magnify on-screen content, recognize text, and hear it read aloud.

<https://github.com/TonyRoyze/monocle.git>

B-counting

An accessible, command-driven desktop accounting application designed primarily for blind and low-vision users.

<https://github.com/TonyRoyze/b-counting.git>
